HIMANSHU SHARMA

Software Engineer | Python | JavaScript | Generative AI | Agentic AI
himxnshu@gmail.com | linkedin.com/in/himxnshu01 | github.com/himxnshu | himxnshu.vercel.app

SUMMARY

B.Tech (IT) graduate with strong DSA fundamentals (600+ problems solved) and hands-on projects in network packet analysis, SQL data warehousing and LLM-powered applications. Experienced with Python, SQL Server, FastAPI, multithreading and LangChain. Looking for an entry-level software engineering role.

EDUCATION

Swami Keshvanand Institute of Technology, Management & Gramothan (SKIT), Jaipur 2024
B.Tech in Information Technology | CGPA: 8.5 / 10

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL (T-SQL)
Backend & Web: FastAPI, REST APIs, Streamlit, HTML, CSS
Databases & Data: SQL Server, Data Warehousing (Medallion, Star Schema), ETL, Pandas, NumPy
Generative AI: LangChain, LLaMA 3.2, Groq Cloud, Agentic AI
CS Fundamentals: Data Structures & Algorithms, OOP, Low-Level Design, System Design, Computer Networks, Multithreading
Tools: Git, GitHub, Vercel

PROJECTS

Enterprise Sales Data Warehouse & Analytics Platform SQL Server | Python | FastAPI | Streamlit
GitHub | *Live Demo*

- Built a SQL Server warehouse on Medallion (Bronze/Silver/Gold) architecture, ingesting 6 CRM and ERP CSV files via T-SQL BULK INSERT into a star schema (18K+ customers, 60K+ sales facts).
- Cleaned data in the Silver layer with deduplication, key normalization and SCD Type 2 product history using stored procedures and window functions.
- Automated the ETL run in Python with logging and data-quality checks, served the Gold layer through a FastAPI service (11 REST endpoints), and built an executive portal and Streamlit dashboard for KPIs and sales trends.

Deep Packet Inspection (DPI) Engine Python | Networking | Multithreading | Streamlit
GitHub | *Live Demo*

- Built a multi-threaded DPI engine in pure Python that reads PCAP captures and inspects traffic from Layer 2 to Layer 7, parsing Ethernet, IPv4, TCP and UDP headers.
- Extracted TLS SNI, HTTP Host and DNS queries to classify applications, and tracked bidirectional 5-tuple flows with a consistent hash and connection states.
- Designed a producer-consumer pipeline with load balancers and fast-path workers, enforcing IP, port, application and wildcard-domain blocking rules, with a Streamlit dashboard for rules, packets and charts.

AI LinkedIn Post Generator Python | LangChain | LLaMA 3.2 | Groq | Streamlit

- Built a GenAI app that generates LinkedIn posts from user-selected topics, with options for length, language and tone.
- Integrated LLaMA 3.2 via Groq Cloud with LangChain for orchestration and prompt management; Streamlit UI with editing, analysis and post history.

CERTIFICATIONS

Agentic AI - Oracle University | Programming with JavaScript - Meta (Coursera) | Python - freeCodeCamp

PROFESSIONAL DEVELOPMENT

UPSC Civil Services Examination Preparation 2024 - 2026

- Two years of self-directed study building analytical reasoning, research, written communication and long-term time management.

VOLUNTEERING

Pehchaan - The Street School, Delhi | Volunteer Feb 2025 - May 2025

- Supported CSR donation and fundraising initiatives for community-focused programs.
- Contributed to training, research, events and collaboration activities supporting the organization.

Kshitiksha Foundation | Volunteer Jan 2025 - Feb 2025

- Supported fundraising and CSR donation initiatives for community welfare.
- Took part in food distribution for families in need and animals, and in sapling plantation drives.
